## **SCIENCE-**

- 1- Ananya was helping her father in the kitchen when she noticed three identical clear jars on the counter. The labels had fallen off, but her father told her that one contained Lemon Juice, one contained Baking Soda solution, and the third contained Sugar Water.

To identify them without tasting (since some chemicals can be harmful), Ananya used Red Litmus paper and Blue Litmus paper. Here is what she observed:

**Jar A:** Turned Blue Litmus paper Red. Red Litmus remained Red.

**Jar B:** Turned Red Litmus paper Blue. Blue Litmus remained Blue.

**Jar C:** No change in the colour of either Red or Blue Litmus paper.

Based on Ananya's observations, identify which substance is in Jar A, Jar B, and Jar C.

- Q. Which jar contains a substance that would taste sour? Explain why using the concept of Acids.
- Q. Why did Jar C not change the colour of either litmus paper? What category of substances does Sugar Water belong to?
- Q. If Ananya had used Turmeric paste as a natural indicator instead of litmus paper, which jar would have turned the paste Red?
- Q. If Ananya accidentally spills Jar A (Acid) on the floor, which jar's contents (B or C) could be used to neutralize it? Why?
- 2- Why is it dangerous to fly kites near overhead power lines, especially if you are using a metallic string (manjha) or if the string is wet from the rain?
